

MINUTES

Regular Chapter Meeting
October 6, 2011

Sign In and Introductions

18 in attendance. Motion to accept minutes, seconded, approved.

Discussions, Committee Reports

Question was raised on any Code requirement for vertical grab bars in Public Facilities. No response as to new Code requirement.

Also question was raised with regards to the requirement for expansion tanks on water heater systems. Consensus was for closed systems.

Statement was made that Code restricts ABS being exposed in Commercial applications due to flame spread index.

Brian asked if many CRC applications have been made and are any projects being done using the new CRC design criteria. Response indicated a mix of use of the CBC or CRC.

Brian shared Chapter finances/balances with members. Also the subject of the installation luncheon that had been held in the past was discussed for the Chapter to reinstate, where the Chapter sponsors the luncheon. A BBQ was mentioned similar to what the Ventura Chapter puts on. Having a Saturday event was proposed. It was discussed raising dues or looking for potential sponsorships to support the event.

Howie shared an update on the November 15th CPC/CMC training w/ John LaTorra as facilitator (23 signed up so far). The location was still in question at the time of the monthly meeting. SLO was the desired location due to centrality.

Turko Semmes, Semmes and Company Builders

Presentation on Straw Bale construction.

Meeting Adjourned
